SUMMARY:

Lead Backend Engineer with 6+ years of production experience architecting mission-critical Java Spring Boot microservices, high-throughput Apache Kafka event pipelines, and scalable PostgreSQL database clusters on AWS.

TECHNICAL SKILLS:

- Programming Languages: Java, Python, SQL, Go
- Frameworks & Libraries: Spring Boot, Spring Cloud, Hibernate, FastAPI
- Databases: PostgreSQL, Redis, MySQL, DynamoDB
- Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, CI/CD, Terraform
- Architecture: REST APIs, Apache Kafka, Microservices, Event-Driven Architecture

PROFESSIONAL EXPERIENCE:

Lead Software Engineer | FinTech Cloud Systems | Austin, TX

Jan 2022 - Present (2.5 years)

- Architected enterprise Spring Boot REST microservices processing over \$50M daily transactions.
- Designed distributed real-time messaging pipeline utilizing Apache Kafka and PostgreSQL.
- Reduced API latency by 45% using Redis caching and PostgreSQL query optimization.
- Led cloud migration of legacy monolith to containerized Kubernetes services on AWS.

Senior Backend Engineer | CloudScale Tech | San Jose, CA

Jun 2018 - Dec 2021 (3.5 years)

- Developed Java REST APIs for e-commerce payment processing platform.
- Managed PostgreSQL database schema migrations and automated backups.
- Integrated Docker and GitHub Actions CI/CD pipelines.

EDUCATION:

Bachelor of Science in Computer Science

University of Texas at Austin (2018) | GPA: 3.9 / 4.0

CERTIFICATIONS:

AWS Certified Solutions Architect - Professional (2023)
